Profile

An enthusiastic computer science student capable of self-learning with minimum supervision. An eager to work in a team where I can showcase my skills, solve challenging problems and contribute to the growth of the company as well as myself. A motivated web developer with little experience in designing and developing prominently remarkable and responsive websites. Proficient in HTML, CSS, JavaScript, jQuery and have little info about modern frameworks such as ReactJS and back-end technologies including PHP, Python, along with MySQL database integration.

Projects

ICT, DSA - Past   **Event Management**
System designed using MS Access database tools for both front & back-end & in DSA using C++ concept.

DBMS - Past   **Car Rental System**
System designed on MySQL integrated with a rent a car queue system.
